# How BlackArmor® Increases Confidence in Making Decisions During Follow-Up

## Post-Op CT

## **Patient**

A 57-year-old female patient with myelopathy and existing C3/C4 disc degeneration was diagnosed with C4 metastasis from renal cancer.

#### **Treatment**

Vertebrectomy and anterior stabilization with the KONG®-C VBR System and the icotec Anterior Cervical Plate.

# Post-Op MRI

#### Post-Op

Successful decompression of the spinal cord and good positioning of the implants could be assessed on low-artifact imaging without any problems.
